

**To Whom it may concern**

This is to confirm that Glen Petersen of "G. Petersen Plumbing & Heating", performed various plumbing and heating repairs and installations over the last five years at the Institute of Ocean Sciences at 9860 West Saanich Road Sidney, B.C. which comprises of 300,000 square feet of Canada's finest Research Laboratories of the Federal Government. His work was always of the best quality and his pricing was competitive. Glen was well aware of the critical operations in our complex laboratory and he performed his work without interrupting our programs and to our complete satisfaction. I would recommend Glen to anyone that requires first class heating or plumbing installations. I will miss Glen as he became a large part of our service here at the Institute. From the maintenance staff we wish Glen all the best in his endeavors for the future.
