To whom it may concern:

Glenn Petersen has had a working relationship with Oak Bay Marine Group for ten years. During that time he has been available to us for projects, consultation and emergencies. On all occasions he has conducted himself with the utmost of professionalism and has always offered a high degree of expertise and workmanship that seemed unavailable elsewhere.

The ships that we operate are unusual in a number of respects. They all operate in remote areas and have a variety of environmental, power and consumption concerns. However, as each of them is of a different age and history, the systems in place are not even comparable. Different processes for water transferral, water containment, heating and waste disposal all create different problems and require individual solutions. Under all circumstances Glenn Petersen has given us great insight into improvements that can or should be made. Working under a tight budget does not always meet well with what is the optimum repair or adjustment. To that end, Glenn has always been creative in his approach to problem solving and money saving ideas. His work has always been completed according to an initial estimate and to our complete satisfaction.

Our experience is that no job is too small or too large for Glenn to tackle. His availability was always second to none. In fact, on a number of occasions he was willing to affect repairs while our ships were on location. In short, we would not be able to ask for a more accommodating, professional and thorough individual to do work for our Company. We will miss his input and would welcome him back at any opportunity.

Sincerely,

OAK BAY MARINE GROUP

Peter Chambers,
Manager, Northern Resorts
